

Touch₂O_{.xt}™ Technology

Touch₂O_{.xt}™ Technology

Clean.

When hands are messy, you can start the flow of water with a tap or even without touching the faucet.

Simple.

A simple tap or placing your hands within the sensing field turns the faucet on and off.

Efficient.

Turning the water on and off hands free or with just a touch makes bathroom tasks easier

Water-efficient.

Tap and hands-free features make it easier to turn off the water flow when not needed between tasks, helping save water.

Flexible.

Tap the handle or spout for a constant flow of water. Use hands-free mode for repetitive tasks like washing hands.

Touch₂O_{.xt}™ Technology

Features:

- Touch Activation
 - Tap it on. Tap it Off.
- Hands-Free Activation
 - Entire spout acts as a sensor
- Automatic Shut-off
